

## Client experience matters more than ever

### So does delivering an affordable experience

MillerKnoll Financial Solutions helps you provide an outstanding client experience in a way that's best for your budget and goals. Office furniture, equipment, and software—we finance it all quickly and easily, with terms expertly customized for your unique needs as a law office.

- 1. Accounting benefits**  
Balance sheet considerations, such as operational versus capital expenditures, are important decisions when investing in your business. We help you design a financing solution that best fits your accounting and tax requirements.
- 2. Payment terms**  
Terms can range from 12 to 72 months with flexible end-of-term options. Extend the term to six years to lower your monthly payment.
- 3. End-of-term options**  
You can own your solution with a \$1.00 purchase option. Or with a true lease, you have the option to own or return furniture and equipment at the end of the term, with an affordable payment during the term. Also, you can extend your lease month-to-month for a specified period of time.
- 4. Add-on options**  
With any of our options, you can add to your solution at any time with a simple increase to your monthly payment.
- 5. 100% financing**  
Unlike some financing, which often requires a down payment and excludes soft costs, we can finance your entire solution, including delivery, setup, services, and more.
- 6. Maximize capital**  
Your monthly payments do not affect your established line of credit, cash reserves, or require a compensating deposit balance. You have more capital for your business.
- 7. Inflation friendly**  
As costs go up over the term of your contract, you pay the same rate as when you began. That stretches your dollars and gives you more access to the cash in your business.
- 8. Cash flow flexibility**  
Tailoring payment terms and structures to match unique needs, such as seasonality, expansion plans, or revenue cycles, lets you get more out of your budget.
